A: Pasquale Daponte <daponte@unisannio.it>

Dear France,

I'm writing you to ask some clarifications:

- According to the suspension, what is the new eligibility period of the project? we need to organize our last workshop and consortium meeting in Georgia and complete the Course to Instruct Attendees (CIA) in Georgia (they was announced for the 1st of March but as you know the lock-down blocked all. In Armenia the CIA is suspended.
- According to the suspension, what is the final date of the project?
- If someone have worked until the 14th of April, can be paid the 30th of April? as you know there is a normal "bureaucratic" delay.
- If some Partners have started the procedure to buy an equipment during the eligibility period (before 14th April), but the equipment is delivered during the suspension period and report on the invoice a date that is in the suspension period, this cost is eligible?
- Is some Partners have start the procedure to buy a service "staff cost" during the eligibility period (before 14th April), for example translation/printing of didactic material, and the service is completed during the suspension period and report on the invoice a date that is in the suspension period, this cost is eligible?

Sorry for the many questions but this is the first time that we manage this situation.

Warm regards,  
Francesco
